

ETCD

ecommerce-etcd-qa is the namespace

<https://confluence.wsgc.com/display/TAH/Rebuilding+etcd+Clusters>

1:20

has the steps

1:20

but problem is you have add data for all non prod after building it
bootstrap data for each environment

1:24

and also

1:24

dont know if this error is due to network or space
