

## NS deletion

Hi folks;

Over the next few days, Shreekar is going to delete the below 275 NSes. All are using default quota and many have no pods, but I wanted to make sure we were all aware of the project. These are all free from being a declared dependency of another service, over 8 days old, and have no pods or no logs indicating an unrecorded integration.

Many thanks to @Thom for laying the groundwork for being able to do this in a more automated fashion going forward.

@Rama @Siva please take note, in case any of these NSes don't pass the scream test.

Thanks  
Josh
